

PRACTICE Qs VIDEO: Q1 - LC217 CONTAINS DUPLICATE

GIVEN AN INTEGER ARRAY "nums" RETURN TRUE IF ANY VALUE APPEARS AT LEAST TWICE
ELSE RETURN FALSE

SOL:

• THIS IS THE SAME AS THE DUPLICATE LETTERS IN A STRING

↳ MORE SIMPLE BE EACH DIGIT IS 0-9

SO WE COULD EITHER USE A LENGTH 10 ARRAY TO TRACK EACH VALUE WITH THE DIGIT AS THE INDEX

OR WE COULD TRACK IT WITH A SHORT WHICH IS 2 BYTES OR 16 BITS OF BINARY INFORMATION

RETURN TRUE		CONTINUE
EX: CHECKER: 00001000	OR	10001011
CUR: & 00001000		00010000
00001000		00000000

TESTING: 123

CHECKER: 0000 0000 0000 0000

CUR : 0 0 0 0 0000 0000 0010
